

High Availability

“Whatever type of technology our company is interested in, we always speak to Dynamix Group first. They are our IT Partner.”

- Director of IT, Manufacturing Company

SUCCESS STORY

For an international vehicle manufacturing facility, an hour of down time equates to \$125,000.00 loss. Dynamix Group created a High Availability system with 0% down time and exceeded projected ROI.

CLIENT NEED

In order to quantify the scale of a potential disaster, our client calculated the loss - \$125,000.00 an hour/ \$2,080.00 a minute. When executives saw the fiscal importance of a high availability system, they asked Dynamix Group to propose a solution that ensured continuous availability and complete disaster recovery.

DYNAMIX SOLUTION

In order to fit the right technology with the right business process at the right time, Dynamix Group strategically aligned the IT and business needs of the company. With a thorough understanding of the overall strategic business plan and organization process, and the IT department's strategic plan and infrastructure process, Dynamix Group architected the ideal solution.

Through the use of hardware, software and services, Dynamix Group created a tailored solution that exceeded all of the client's requirements.

THE RESULT

No unscheduled downtime in the last two years. Need we say more.
