

High Availability

“Whatever type of technology our company is interested in, we always speak to Dynamix Group first. They are our IT Partner.”

- Director of IT, Manufacturing Company

SUCCESS STORY

For a trucking company with 4300 trucks in route at any time, down time is a disaster. By running the company on its back up system for two weeks out of the year, Dynamix Group helps to ensure there is never downtime.

CLIENT NEED

Our client couldn't afford time for nightly tape back ups but they knew the necessity of protecting themselves from a disaster. Quick recovery and no downtime was critical. Dynamix Group created a solution for the shipping giant.

DYNAMIX SOLUTION

At the primary data center, Dynamix Group set up a second machine running MMIX that communicates with their HA data center. In less than 60 minutes, the company can be completely online at the HA site. Practice makes perfect. Our client spends two weeks out of the year running its company on its back up system to ensure data integrity in the case of an emergency.

THE RESULT

Trucks that stay on route no matter what is happening at home!

PRODUCTS/SERVICES

- IBM eServer i5
- Lakeview MIMIX HA1
- Dynamix Group Technical Services
