

Storage Management

“Whatever type of technology our company is interested in, we always speak to Dynamix Group first. They are our IT Partner.”

- Director of IT, Manufacturing Company

SUCCESS STORY

Dynamix Group's creation of an automated storage management and disaster recovery system saved a leading health care company over \$400,000 in annual operating costs.

CLIENT NEED

A high-integrity, more efficient storage and backup solution that would eliminate the need for an expensive third-party disaster recovery contract. Ensure 24 x 7 availability of health care information for caregivers and administrators: clinical data is of "life or death" importance.

DYNAMIX SOLUTION

Created an on demand operating infrastructure that is consolidated, dependable and provides an automated storage management and backup solution. Dynamix Group provided this client with a high performance, low maintenance, automated storage solution, with a short startup capability, to replace an outdated manual process. The IT staff was able to "do more with less."

THE RESULT

Besides building a storage solution project, this health care company has realized several other benefits beyond disaster recovery. They can do hardware and application maintenance on servers without an outage. Data is seamlessly moved, reaction to customer needs is streamlined. Costs are reduced. Since installation, this system has never failed.

PRODUCTS/SERVICES

- IBM TotalStorage
- Tivoli Storage Manager
- Dynamix Group Technical Services
