

Disaster Recovery

“We can’t afford to pay a premium to be back online in five minutes, so we can afford some down-time. Dynamix Group saved us thousands of dollars each month for our off-site disaster recovery and we didn’t have to sacrifice time or quality.”

SUCCESS STORY

Cutting cost and not compromising quality for a large janitorial services company.

CLIENT NEED

A large janitorial services company needed to restructure its off site disaster recovery based on cost. They were looking for a partner who could save them money and get the same service if not better than what they received from Sungard.

DYNAMIX GROUP SOLUTION

Dynamix Group saved their client \$7,000.00 a month on their Disaster Recovery Service. The client also received exclusive rights to one server, not a shared machine. With three recovery centers within the United States, Dynamix Group’s client can pick which location is most convenient for their recovery needs. With back up tapes in hand, the client could potentially be back online in a matter of minutes. The client has successfully tested the disaster recovery system since partnering with the Dynamix Group.

THE RESULT

An efficient, convenient and economical way to handle Disaster Recovery for our IT business systems.

PRODUCTS/SERVICES

- IBM System i550
- IBM Business Continuity Recovery Services
