

Dynamix Group and IBM invite you to discover why some of the most demanding organizations trust their IT operations to **IBM Tivoli Endpoint Manager**

Please join us for this *exclusive luncheon event* being conducted in Greenville, South Carolina and hear the latest announcement in IBM Storage Management.

When it comes to Endpoint Management, does your organization struggle with:

- Discovering, managing and protecting your distributed endpoints?
- Fast-moving threats, complicated and varied technologies?
- Compliance audits, cost reduction pressures and distributed computing?

At this event, you will find out how to simplify endpoint operations and security with Tivoli Endpoint Manager by:

- Enabling **real time**, accurate reports on inventory and compliance across all endpoints
- Consolidating infrastructure to **one quiet, multi-purpose agent, one unified console and one server for over 250,000 endpoints**
- Saving as much as 30% of annual software costs by reclaiming under-used software applications and avoid over-deployment to **ensure compliance with vendor contracts**
- **Reducing endpoint management labor by a factor of 20:1** to focus on higher value projects

Date:

Thursday - February 23, 2012

Time:

Arrival: 11:15am

Seminar/Luncheon 11:30am

Conclude: 1:15pm
