

Do you know the backup status of your environment right now?

Are you confident you can recover your data from an unexpected outage?

A Data Protection Solution

Your data is invaluable and irreplaceable. Despite a greater demand on existing staff and strained budgets, your data keeps growing. In order to bridge the productivity gaps, new methods are needed to ensure your data is protected.

Introducing **Protect*IT**.

Protect*IT eliminates the daily and inevitable challenges of TSM administration by leveraging a team of seasoned experts to manage your environment—giving you real time visibility into the status of your protection.

Stay Fit for Your Environment

With over 50 years of collective TSM experience devoted to managing your environment, the **Protect *IT** team can ensure the protection of your data. Regardless of changes in location, personnel, or the organizational structure of your company, your data is safe with **Protect *IT**.

Get back the time and resources you need to grow your business. Our team of architects and engineers have the resources to respond to the complex and increasing demands placed on backup and recovery services.

Powered By Predatar

Dynamix is proud to partner with Predatar. Leveraging the powerful open platform of TSM, Predatar offers practical storage and data solutions that combine cloud, analytics, mobile and social computing. With Predatar, you can take the risk and cost out of managing and protecting business critical data.

Protect*IT has the intelligence and reporting software to develop environmental trends and proactively assess growth. In an increasingly complex and ever expanding backup infrastructure, **Protect*IT** provides you with the visibility to confidently report and predict the fitness of your data.

Secure the future of your business. Safeguard your data with Dynamix Protect*IT.

With Protect*IT, You Can:

- Determine which systems consume the most backup space today and historically.
- Identify the success rates of your backup environment.
- Assess your backup growth rates over the past 6, 12, or 24 months.
- Pinpoint when your backup infrastructure will need additional capacity.
- Guarantee that your data is protected from disaster.
